

**PRESENT ANYWHERE,
BE SUCCESSFUL ANYTIME**

crowdbeamer

The clever presentation system
that amplifies the impact of your message

A DEVICE THAT TAKES YOUR MESSAGE STRAIGHT TO YOUR AUDIENCE

Crowdbeamer delivers your screen content directly and in real time to all portable devices of your audience, enabling them to capture what they see and complete it with notes. That builds the level of audience engagement needed to make your presentation successful and create real impact with your message.

Plug & present

Just connect your laptop or any other device with an HDMI or VGA output, and leave it to crowdbeamer to mirror your screen content to all portable devices of your audience. All you need to do is give your full attention to your audience.

Wherever people meet

Take crowdbeamer with you, wherever you go. Whether you're presenting in a conference room, a huddle space or anywhere else, crowdbeamer always lets you share your screen content thanks to its built-in WiFi and battery.

Secure sharing

While you are presenting, your audience never needs to access any corporate network to enjoy the crowdbeamer benefits. Presenting confidential information? Always stay in control when sharing, and easily change access passwords between different presentation sessions.

AN APP THAT EMPOWERS YOUR AUDIENCE TO ACT ON THE INFORMATION YOU DELIVER

The free crowdbeamer app keeps your audience actively connected to your message. It lets everybody decide which content to capture and how to enrich it. It lets everybody build a library of personalized information that stays easily accessible - extending the success of your presentation over time.

Real-time sharing

Crowdbeamer mirrors your screen content in real time to the app, giving your audience a clear view of whatever you present - anytime, anywhere. No need for you to upload files or send emails to deliver handouts to the participants. That frees up valuable time to prepare your presentation in the best way possible and fine-tune your message until the very last moment.

Personalized information

With the crowdbeamer app installed on their smartphone, tablet or laptop, anybody can decide which screen content to capture and how to add notes, mark text, ... to build a library of personalized handouts. And whether you're sharing a PowerPoint presentation, a spreadsheet or a web page, that really doesn't make a difference.

A long-term impact

Making it easy to export personalized handouts to other business apps or share them with peers, the crowdbeamer app ensures that everybody in your audience can use and spread your message. Isn't that the kind of success you're looking after, whenever you give a presentation?

CROWDBEAM SCALES TO THE SIZE OF YOUR AUDIENCE

- Sales presentations
- Project meetings
- Board meetings
- Seminars
- Training & education
- Team events
- Academic courses
- General assemblies
- Conferences

And these are just a few examples. You can use crowdbeamer to present to any audience up to 200. Success guaranteed – anytime, anywhere.

Whatever you present, crowdbeamer takes your content straight to all portable devices of your audience. Empowering everybody to actively engage with your presentation content, crowdbeamer keeps your audience connected to your message.

Crowdbeamer provides your audience instant access to usable and up-to-the-minute screen captures of your presentation content. And since these remain readily available on everybody's smartphone, tablet or laptop long after you've finished your presentation, crowdbeamer amplifies the impact of your message over time.
